

# Improving Opioid Prescribing

## Continuing medical education for physicians & health care teams

In response to concern for the opioid abuse epidemic, this Wisconsin Medical Society webinar series is aimed at improving opioid prescribing without compromising the quality of patient care.

Presented by Wisconsin physicians who specialize in addiction and pain management, these webinars are designed to address the challenges faced by physicians and other prescribers and to improve opioid prescribing practices without compromising the quality of patient care.

Each webinar has been approved by the MEB. Those marked with (\*) are 2 hours long and fulfill the MEB educational requirement; the others vary in length and may be combined to meet the 2-hour threshold. All have been approved for *AMA PRA Category 1 Credit™* and maintenance of Certification Part II points for certain specialties.
