I grew up with books; I read constantly. My relatives always said they never knew what I looked like because I always had a book stuck in front of my face,” said Wendy Molaska, MD, a family physician who has made her passion for reading an integral part of her practice.

Since her residency, Dr Molaska has been a champion of Reach Out and Read (ROR), a program that promotes early literacy and school readiness by getting books in the hands of children beginning at 6 months of age.

During well-child visits, physicians give each child between 6 months and 5 years old a new book to take home that is age-, developmentally and culturally appropriate. They also discuss with parents the importance of reading aloud to their children each day, and for those parents who may feel uncomfortable or hesitant to read aloud to their kids, they offer encouragement and suggestions.

ROR data indicate that while “34% of American children entering kindergarten lack the basic language skills they will need to learn to read,” the ROR model is an effective, low-cost intervention. “Parents involved with ROR are 4 times more likely to read with their children; parents for whom English is a second language are 10 times more likely to read with their children. Children participating in ROR score significantly higher on vocabulary tests and start kindergarten with a 6-month developmental edge.”

“I got introduced to Reach Out and Read in residency and thought it was such a cool program,” said Dr Molaska, who completed her residency at North Memorial Hospital in Minneapolis, Minnesota, where the diverse population included African American, Hispanic, Hmong and Somali patients.

“I saw how important Reach Out and Read was because it was a very underserved population and English was a second language for many patients,” Dr Molaska said. “Many of the parents were illiterate, so we did a lot in terms of other literacy skills; we had referral sources to help them. Even without reading ability, parents can still point to pictures and work on language. It’s time together—without TV.”

Following her residency, Dr Molaska moved to Fort Morgan, Colorado, where she practiced in a federally funded community health center.

“The Fort Morgan clinic didn’t have ROR but needed it,” she said. “Its population was very underserved, mostly Spanish speaking, and many of the kids had no books at home. When it comes to buying food or buying books, people are going to buy food.”

So Dr Molaska, who says she “can’t imagine a life without books,” worked with the Colorado Reach Out and Read Coalition as well as an Americorps volunteer at the clinic to establish a ROR program there. In addition to providing new books to children during their well-child visits, gently used books were placed in the exam rooms and waiting room for patients to take home. Families also were encouraged to visit their local library.

After 4 years in Colorado, Dr Molaska returned to her native Wisconsin in 2008, joining Dean Clinic-Platteville. And when she learned the clinic did not have a ROR program, she quickly went to work to establish one. Unlike Colorado, at the time Wisconsin did not have a ROR coalition to help establish the new program. (See sidebar.) But that didn’t deter her.

“I feel that it’s such a huge part of my practice in general that I couldn’t give it up,” Dr Molaska said. “I think everyone can benefit from the message of reading.”

Dr Molaska completed the necessary paperwork and applied for grants to secure startup funding. Thanks in part to a $2000 grant from the Wisconsin Medical Society Foundation, the program was launched in May 2009.

For Dr Molaska’s clinic, which has 700 to 800 well-child checks for patients in the
get to give them a book and we get to use the book for our own benefit. So it really doesn’t add time,” she continued.

And despite some initial hesitation, today Dr Molaska’s colleagues have embraced the program. “I now find my colleagues debating which book they want to give their patients and reminiscing about their favorite children’s books.”

In addition to her involvement with her own clinic’s ROR program, Dr Molaska recently became a certified provider trainer for Reach Out and Read Wisconsin. As a trainer, she provides all-staff orientations for clinics applying to start a Reach Out and Read program.

“I am really excited about becoming more involved in such a great organization as Reach Out and Read,” said Dr Molaska. “ROR is a great opportunity for any pediatrics department to help develop quality early childhood literacy for their patients.”

“When you start doing the program, you see how grateful the parents are and how excited the kids are,” Dr Molaska continued. “Now they come in and ask, ‘Dr Wendy, where’s my book?’”

Reach Out and Read at a Glance

At the national level, more than 4 million children and their families are served annually through ROR programs located in more than 4900 hospitals and health centers throughout the country, including Puerto Rico, the US Virgin Islands and 55 US military bases. Each year, children receive more than 6.5 million books.

Founded in 2010, Reach Out and Read Wisconsin is a statewide coalition that provides technical assistance, quality assurance and book support to participating ROR programs. There are currently about 60 programs in Wisconsin serving more than 44,300 children and families. An initiative of Children’s Health Alliance of Wisconsin and a partnership with American Family Children’s Hospital and Children’s Hospital of Wisconsin, ROR Wisconsin distributes over 72,000 new books annually while working to expand the program. Dipesh Navsaria MD, MPH, MSLIS serves as the coalition’s medical director; Karin Mahony, MEd, MSW, is project manager.

WMJ

The mission of WMJ is to provide a vehicle for professional communication and continuing education for Midwest physicians and other health professionals.

WMJ (ISSN 1098-1861) is published by the Wisconsin Medical Society and is devoted to the interests of the medical profession and health care in the Midwest. The managing editor is responsible for overseeing the production, business operation and contents of the WMJ. The editorial board, chaired by the medical editor, solicits and peer reviews all scientific articles; it does not screen public health, socioeconomic, or organizational articles. Although letters to the editor are reviewed by the medical editor, all signed expressions of opinion belong to the author(s) for which neither WMJ nor the Wisconsin Medical Society take responsibility. WMJ is indexed in Index Medicus, Hospital Literature Index, and Cambridge Scientific Abstracts.

For reprints of this article, contact the WMJ at 866.442.3800 or e-mail wmj@wismed.org.
